National Hispanic Health Foundation

Housekeeping

- Presentations to be followed by 10-15 minute discussion
- Microphones will be muted
- Type questions in chat box
- Recording available next week at www.NHMAMD.org

Learner Notification

NHMA – ENDURING: Impact on Health Care Delivery-Challenges and Innovations

Date of CE Release: July 22, 2020

Date of CE Expiration: July 22, 2021

Location: Online

Acknowledgement of Financial Commercial Support

No financial commercial support was received for this educational activity.

Acknowledgement of In-Kind Commercial Support

No in-kind commercial support was received for this educational activity.

Satisfactory Completion

Learners must complete an evaluation form to receive a certificate of completion. You must participate in the entire activity as partial credit is not available. If you are seeking continuing education credit for a specialty not listed below, it is your responsibility to contact your licensing/certification board to determine course eligibility for your licensing/certification requirement.

Physicians

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, this activity has been planned and implemented by Amedco LLC and National Hispanic Medical Association. Amedco LLC is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team. Credit Designation Statement – Amedco LLC designates this enduring activity for a maximum of 1.00 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Objectives - After attending this program you should be able to:

- Increase knowledge on more efficient hospital care for COVID-19 and Latinos.
- Increase knowledge on telemedicine communications with Latinos who have COVID-19.
- Increase knowledge about home health care strategies for Latinos with COVID-19.

Disclosure of Conflict of Interest

The following table of disclosure information is provided to learners and contains the relevant financial relationships that each individual in a position to control the content disclosed to Amedco. All of these relationships were treated as a conflict of interest, and have been resolved. (C7 SCS 6.1--6.2, 6.5)

All individuals in a position to control the content of CE are listed below.

First	Last	Commercial Interest
Ben	Melano	NA
Elena	Rios, MD, MSPH, FACP	NA
Diana	Torres-Burgos	NA
Sylvia	Trujillo	NA
Xavier	Villarreal	NA

NHMA Advocacy & COVID-19

- Health Equity
 - Target Fed/State resources for health care
 - Educate Latinos about access to health care
- Address challenges of hospitals, telemedicine, home health to meet increased Latino demand
- Train a more diverse, effective workforce
- Collaborate with Hispanic health care professional organizations

Impact of COVID-19 on Healthcare Delivery

Xavier Villareal

Board Secretary, National Association of Latino Healthcare Executives

*CEO, Hillcrest Medical Center
Tulsa, OK*

Impact on Hospitals - Overall

- Hospitalizations of COVID-19 patients are at a rate of 107.2 per 100,000 compared to 67.8 per 100,000 for influenza
- Often used by local agencies and government as a measure of prevalence and surge in a community
- Created an immediate impact to how hospitals manage all patients coming into the facility
- High financial strain on Hospitals and healthcare in general

Immediate Impact to Hospitals

- Visitation and Patients Families
- COVID Units and Impact on Staff
- Educating our Patients and Community
- Impact on Cost

Visitation and Patient Families

- Hospitals are moving to limited or no visitation throughout the country and most have no visitation in the COVID Units
- Families or guest have a drop off and pickup process
- Communication regarding the care and follow-up care of the patient is done only with the patient. Family members are included during pick-up process or through a remote option such as telehealth
- Family waiting rooms are reconfigured to adapt to social distancing
- Universal Masking
- Latino families are particularly hit hard as the family support system is critical
- Technology has been a key part of assisting with a family of visitor connection – IPAD's deployed to all patients

COVID Units and Impact on Staff/Patients

- Units are isolated to reduce spread of COVID but this causes staff to feel isolated
- Donning and removing PPE adds additional time to getting into a patient room – limited entry into room, batching activities with patients, out of room communication, delay in routine care
- Staff exposures – prevention and response
 - Daily screening tool
 - Focus on tracing when employee exposed
 - Staff Quarantines create extra burden on the system
- Shortage of staff across the country and impact of regional response to COVID
- Fear of non clinical staff entering the units

Online: <https://hillcrestmedicalcenter.com/c19screening>

Educating our patients and community

- Serving as a resource to the community
 - All of our spikes locally have been tied directly to large gatherings and businesses that do not allow for social distancing
 - Onsite compliance – masking, visitation
 - Delay in care due to fear
 - Elective and Critical patients
- Impact to our non-traditional avenues of connecting with patients
 - Churches, Schools, Community Centers

Impact on Cost

- Immediate impact on availability of key resources
 - PPE, Bleach, Operating Room supplies and medications
- Disruption in normal distribution patterns
- New pricing of critical items are not sustainable
- Loss of patients due to patient concerns or cancelled elective case had a huge financial impact
 - AHA estimates a total impact of \$202.6 B

Item	Pre-COVID Cost	Post-COVID Cost
Isolation Gowns	\$0.22/ea	\$2.36/ea
KN95 Masks	\$0.51/ea	\$3.58/ea
Bouffant Caps	\$0.02/ea	\$0.60/ea
Shoe Coverings	\$0.07/ea	\$0.32/ea
Ear Loop Masks	\$0.04/ea	\$0.66/ea

Long-term Impact to Hospitals

- Reopening Strategy
 - Establish social distancing in waiting rooms, cafeterias, etc.
 - Testing of patients prior to surgery, testing, admission
 - Limited resources
 - Benefit vs. risk
 - Universal masking
 - COVID-19 Committee
 - Review surges and monitor local/national trends
 - Discuss appropriateness of surgery and non-surgical cases
 - How do you decide which resources to limit and when

Long-term Impact to Hospitals

- Reopening Strategy –
 - Educating patients and families
 - Increased use of technology – patient consideration
 - How to incorporate translation services within telemedicine
 - Encouraging use of medical services when needed versus waiting
 - Patient considerations
 - Cohorting of patients – use of semi-private rooms and staging of cases that normally start in the early morning
 - Follow-up calls to patients to include questions around COVID-19
 - Patients are waiting longer for care and as a result we are seeing a higher acuity patient

Long-term Impact to Hospitals

- Reopening Strategy –
 - Employee Impact
 - Burn-out – how do you measure and adjust
 - How do we ensure staff is safe going forward
 - Quarantine when exposed and impact on ability to treat patients
 - Social Distancing strains programs like orientation, town hall meetings, and celebrations
 - PPE
 - Stock up of PPE to prevent outages
 - Train the staff for use on non-traditional PPE such as KN95 masks
- Difficulty in changing of strategies
 - Restrictions versus reopening
 - Variance in COVID volume in the community

COVID-19: Impact on Healthcare Delivery

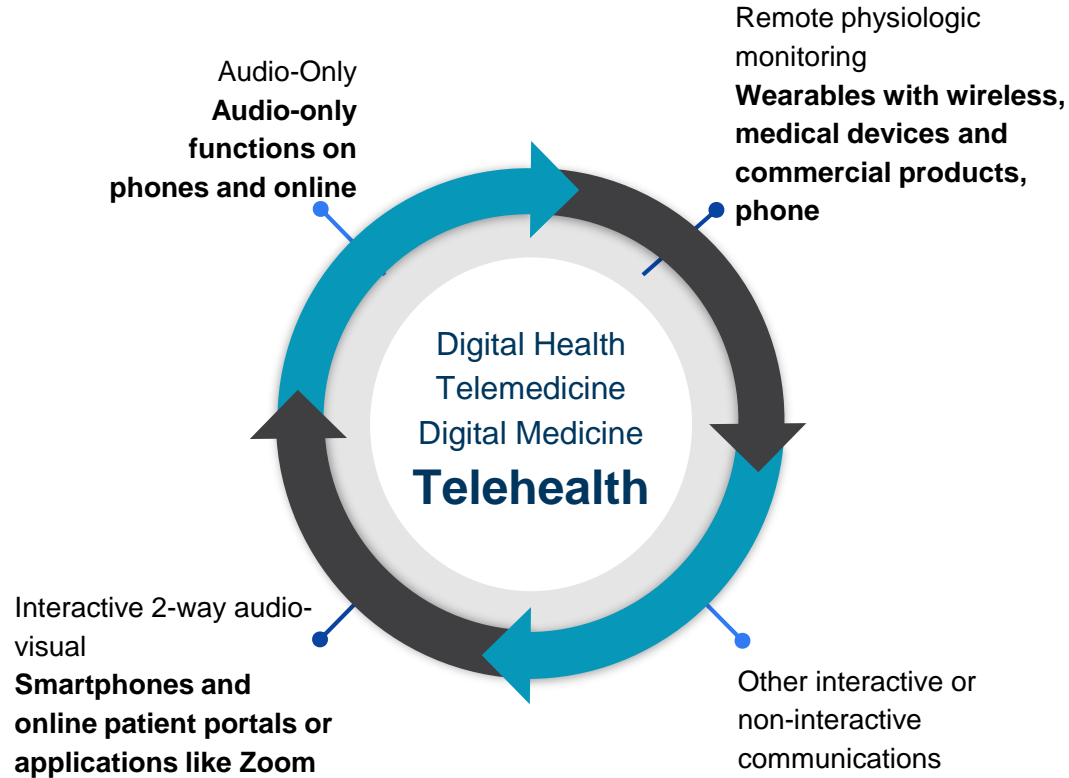

Sylvia Trujillo, MPP, JD

Policy Director & Senior Legislative Counsel

Compassion & Choices

Vancouver, WA

What is telehealth?

Before COVID-19 telehealth adoption was increasing, but very limited

- Physicians support use of digital health
 - 9 out of 10 physicians recognize the benefits of telehealth
 - Two-thirds indicate that virtual care improves patient access
 - More than half recognize it improves patient satisfaction
- The rate limiting factor was not technology adoption rates among Hispanics
 - 87% of US-born Hispanics own a smartphone
 - 69 % of Hispanics born abroad own a smartphone

COVID-19: Immediate threat to healthcare access

COVID-19 surge
Isolated death in hospital
Social distancing
Hospital vectors for spread

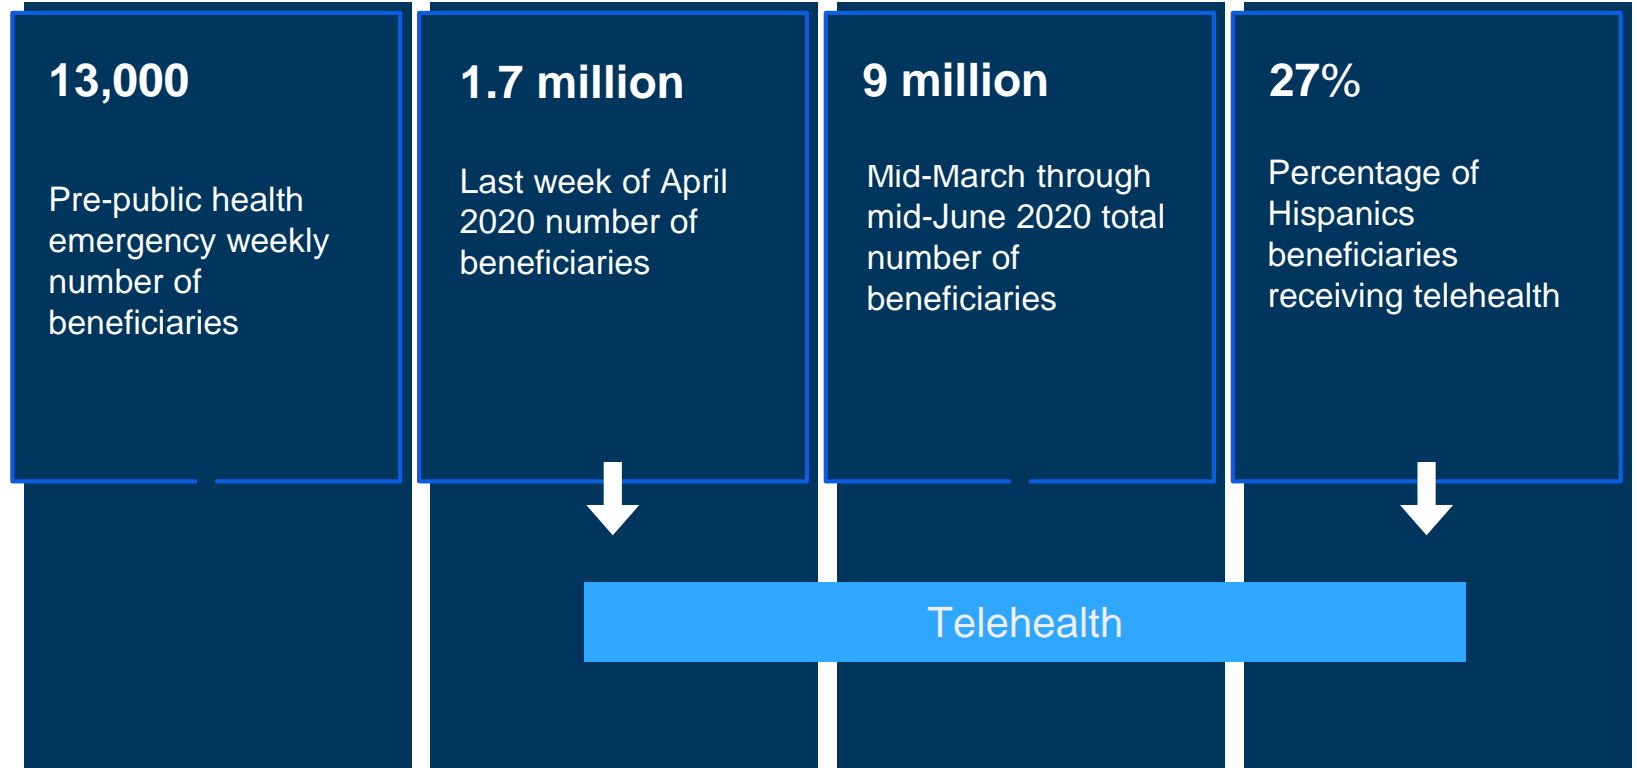

A solution: quality telehealth expands equitable access

Policies and practices impacting adoption

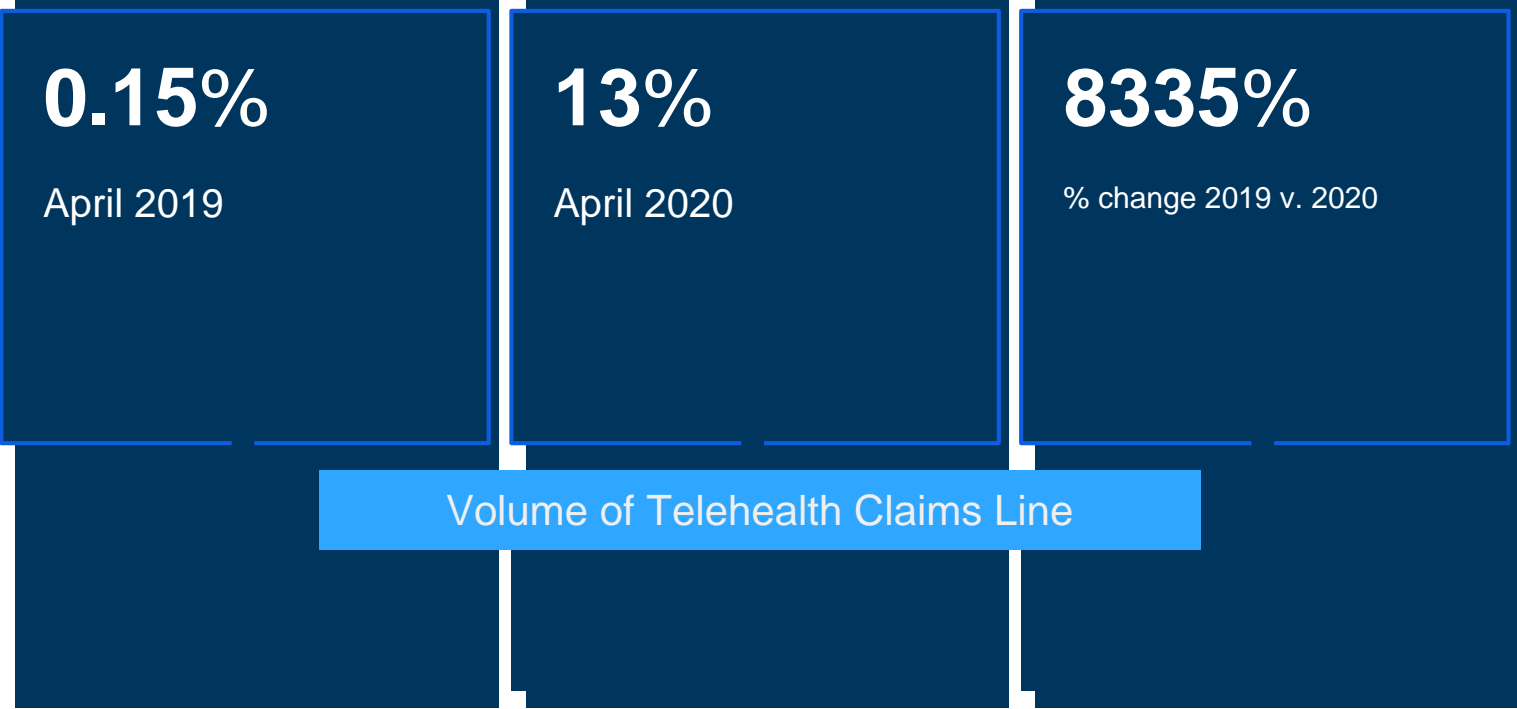

Research and Innovation	Regulation	Coverage/ Payment	Liability	Infrastructure	Training & Professional Development
Basic research, translational research, comparative cost and clinical effectiveness research	Safety and efficacy of products and services, licensure, medical practice regulation, scope, consumer protection	Coverage, payment, coding, conditions of participation, benefit design	Med-mal, product liability, qui tam, civil/criminal, program integrity, fraud and abuse, HIPAA	Interoperability (syntactic & semantic) and portability; broadband, wireless	Technology/ innovation adoption and re-design incentives and support

40 Year Outlook: Dementia as a Case Study

Over the next 20 years, the total prevalence of Alzheimer's disease and related dementias in the US is expected to approximately double from 7.2 million to nearly 13 million

From 2020 to 2060, the number of Latinos with dementia will grow by nearly 440 percent, compared with 69 percent growth among non-Hispanics.

Latinos are likely to be disproportionately impacted by caregiving responsibilities as we have the highest reported prevalence of caregiving.

Source: Kevin A. Matthews et al., "Racial and Ethnic Estimates of Alzheimer's Disease and Related Dementias in the United States (2015–2060) in Adults Aged ≥65 Years," *Alzheimer's & Dementia*, vol. 15 (2019): 20, <https://doi.org/10.1016/j.jalz.2018.06.3063>.

Health Home Care & COVID-19: Challenges and Changes

Diana Torres-Burgos, MD, MPH

*Hispanic Health Advisor, National Hispanic Health
Foundation*

*Chair, NHMA New York City Chapter
New York City, NY*

Home Health Care & Home Care

HOME HEALTH CARE

- Agencies that provide medical services ordered by a physician for a specific condition. May include nursing care to help a person recover from surgery, an accident, or illness, physical, occupational, or speech therapy and temporary home health aide services.
- Services covered by Medicare.

HOME CARE

- Agencies that provide health services and equipment to individuals who are homebound. Includes non-skilled personal care such as Home health aides.
- Services not covered by Medicare.
- Medicare only covers these services if you also are getting skilled nursing care or rehabilitative care that are provided in your home.
- Services may be covered by Medicaid however eligibility and programs for older adults vary by state.

Differences between Home Health Care and Home Care

Home Health Care vs Home Care

	Home Health Care	Home Care
Original Medicare approved	Yes	No
Medicare Advantage approved	Yes, may vary depending on insurer	No
Medicaid approved	Depends on state	Depends on state
Covers long term care	No	Yes, if specified
Skilled nursing	Yes	No
Rehabilitation therapy	Yes	No
Meal preparation	No	Yes
Activities of daily living (bathing, cleaning etc.)	No	Yes
Requirements for enrollment	Yes	No, unless enrolling in Medicaid funded program

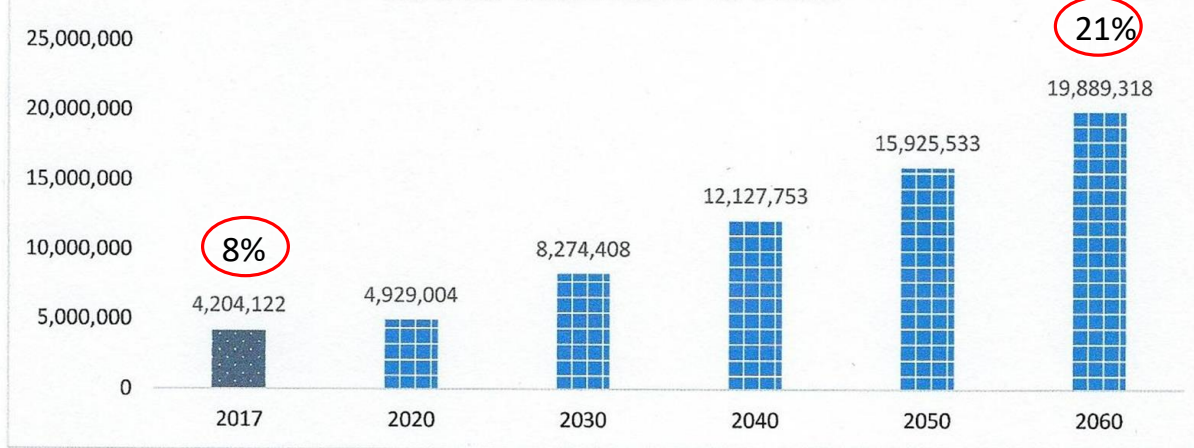

Aging U.S. population and Home Health Care

- **America is Aging.**
- **At increased risk for severe illness with COVID** -Older adults and persons with pre-existing medical conditions
- **Covid19 pandemic revealed that Nursing homes are very vulnerable!**
- According to the CDC National Center for Health Statistics, five major long-term care sectors served 8.3 million people in the US in 2016.
 - Adult day care services (3.5%)
 - **Home health agencies (53.7%) - 82% over 65y**
 - Hospice (17.2%)
 - Nursing homes (16.2%)
 - Residential care communities (9.7%)
- **More people want to stay in place.**

Older Latino population also growing.

Population and Projections of Hispanic Americans Age 65 and Over: 2017 to 2060

- In 2018, 1 in 4 Latinos age 65+ lived alone.

Source: U.S. Census Bureau, *Population Estimates, 2017 and Population Projections, 2017 (revised)*

Direct Care workforce (Frontline workers)

Predominantly female (86%).

Demographics: 30% Black/AA, 18% Hispanic, 7% Asian, 4% Other.

Home care sector

- Highest number of workers of color (62%).
- Relies on immigrant workers, 31% of home care workers born outside US.
- Low wages, benefits vary.

Challenges

- Care Model - face to face in home treatment
- Lack of PPE/testing
- Safety/quarantine of COVID + patients and care givers
- Fear – refusal of receiving or providing services
- Workforce shortage
- Isolation – no social supports
- Unable to do assessments
- Care Access to transition to home care
- Patient-Driven Groupings Model (PDGM)

Changes

- Telemedicine
 - Physician Order
 - Telephonic Health Assessment
 - Reimbursement
- Screening of patients and workers
- Waivers- Reassessments, home visits, Personal Assistant
 - Annual Assessments, in home trainings suspended.
- Finances- State budget impacts

Home Health Care Future

“Demand for Home health care will only increase as population ages and more patients and families opting to receive care at home.”

VIRTUAL BRIEFING SERIES

SESSION 1: Managing Chronic Care Patients with COVID-19

SESSION 2: COVID-19 and Latino Mental Health

SESSION 3: WEDNESDAY, JULY 22, 2020

COVID-19 Impacts on Health Care Delivery

7:00 PM - 8:15 PM Eastern Time

SESSION 4: WEDNESDAY, AUGUST 26, 2020

Dealing with the New Normal

7:00 PM - 8:15PM Eastern Time
