May 18, 2018

Office of Governor Christopher Sununu
State House
107 North Main Street
Concord, NH 03301

Dear Governor Sununu:

On behalf of the Board of Directors of the National Hispanic Medical Association, we urge you to sign House Bill 1791 into law.

This bill authorizes a pharmacist to substitute an alternative biological product when filling a prescription for a prescribed biological product if the alternative biological product is designated as interchangeable with the reference product and if communication is provided to the patient and physician that a substitution was made. This bill would also require that the substitution of a biological product be communicated to the patient.

We recognize the rising use of biologics and biosimilars in our population now aging with increased chronic disease. Biosimilars go through an extensive review process and manufacturers are required to submit immense studies and data demonstrating a product’s efficacy and ensuring it is safe for use by consumers. A pathway for biosimilar regulation in the U.S. was established as a provision of the 2008 Patient Protection and Affordable Care Act (ACA) and in 2012 the FDA issued draft guidelines for biosimilars and a list of biosimilars and interchangeable biological products.

In summary, the National Hispanic Medical Association recommends that you sign HB 1791 into law to clarify the procedures for biosimilar substitution for biologic treatments in a way that increases safety for the patient. We are especially supportive since this bill will provide increased access to quality treatment for Hispanics and all persons from New Hampshire with chronic diseases.

Sincerely,

Elena Rios, MD, MSPH, FACP
President & CEO
